User journey 1: at the counter, from list to confirmed order

The associate serves the customer in person. SRS v2: UC1 to UC4, FR-001 to FR-020.

R1

- Manual re-keying: every line typed by hand, about 12 min per list (Round 1 estimate)
- Shift-dependent advice
- Lost sales: "sorry, out of stock"
- Fragmented systems: one connector, CSV fallback

Alternative paths and guardrails

AI is off
Hard rules and manual catalog search keep the counter running; suggestions are labelled rule-based (FR-003, 033).

Line is not an order line
The associate removes it (title, greeting). The last remaining line cannot be removed.

Customer declines
A reason is recorded and the line stays open; the SKU never changes without agreement (FR-016).

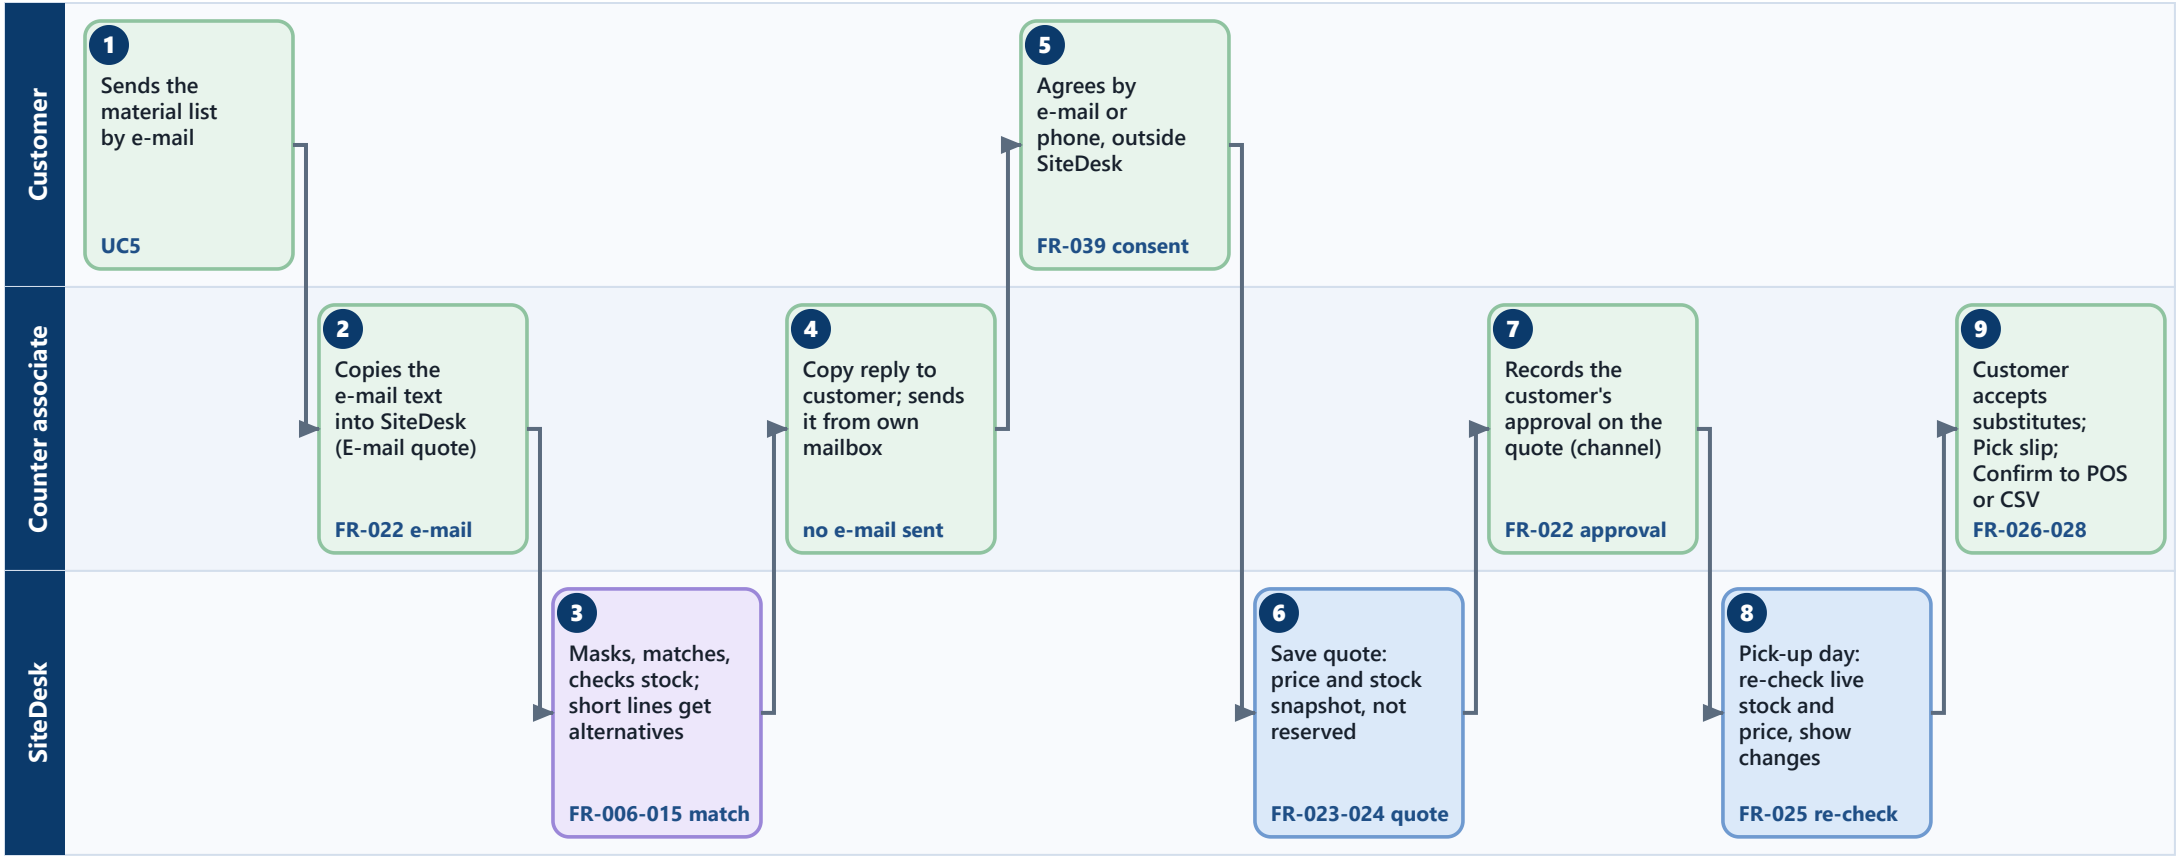

POS is down
CSV export with the same reference; status NEEDS_MANUAL; the associate keys it into the legacy POS.

Value shown on the receipt of every order
Sales rescued by substitutes · time from upload to Confirm. Measured per order on simulated data; Round 1 targets are not claimed as results.

AI-assisted (local embeddings) · Hard rules (deterministic) · Human decision or action · R1 = Round 1 problem · FR = requirement in the team's SRS v2

User journey 2: e-mail request to pre-order and pick-up

The customer is not at the counter. SRS v2: UC5, FR-022 to FR-028, FR-039 and FR-040.

R1

- Manual re-keying of e-mailed lists
- Customers wait for answers; advice depends on the shift
- Stock changes between order and pick-up cause wrong picks and re-deliveries
- Fragmented systems

Alternative paths and guardrails

No quote, no Confirm
An e-mail request cannot be confirmed without its quote (QUOTE_REQUIRED).

No approval, no Prepare
Sending the quote is not approval: Prepare is refused until the customer's approval is recorded.

Stock changed since the quote
Short lines are marked; the substitute is accepted now, or an earlier agreement is recorded.

Quote expires or is cancelled
Expiry is evaluated when the quote is opened; an expired or cancelled quote cannot be confirmed.

Why this journey matters

Nothing is reserved between the quote and the pick-up, so the live re-check is what keeps promises honest. The yard can prepare with the Pick slip before the customer arrives (Round 1, 07:00 pre-pick).
