User journey 1: at the counter

The associate serves the customer in person · SRS v2: UC1 to UC4

Alternative paths and guardrails

AI is off
Rules and manual search keep working.

Not an order line
Associate removes it; the last line stays.

Customer declines
Reason recorded; SKU unchanged.

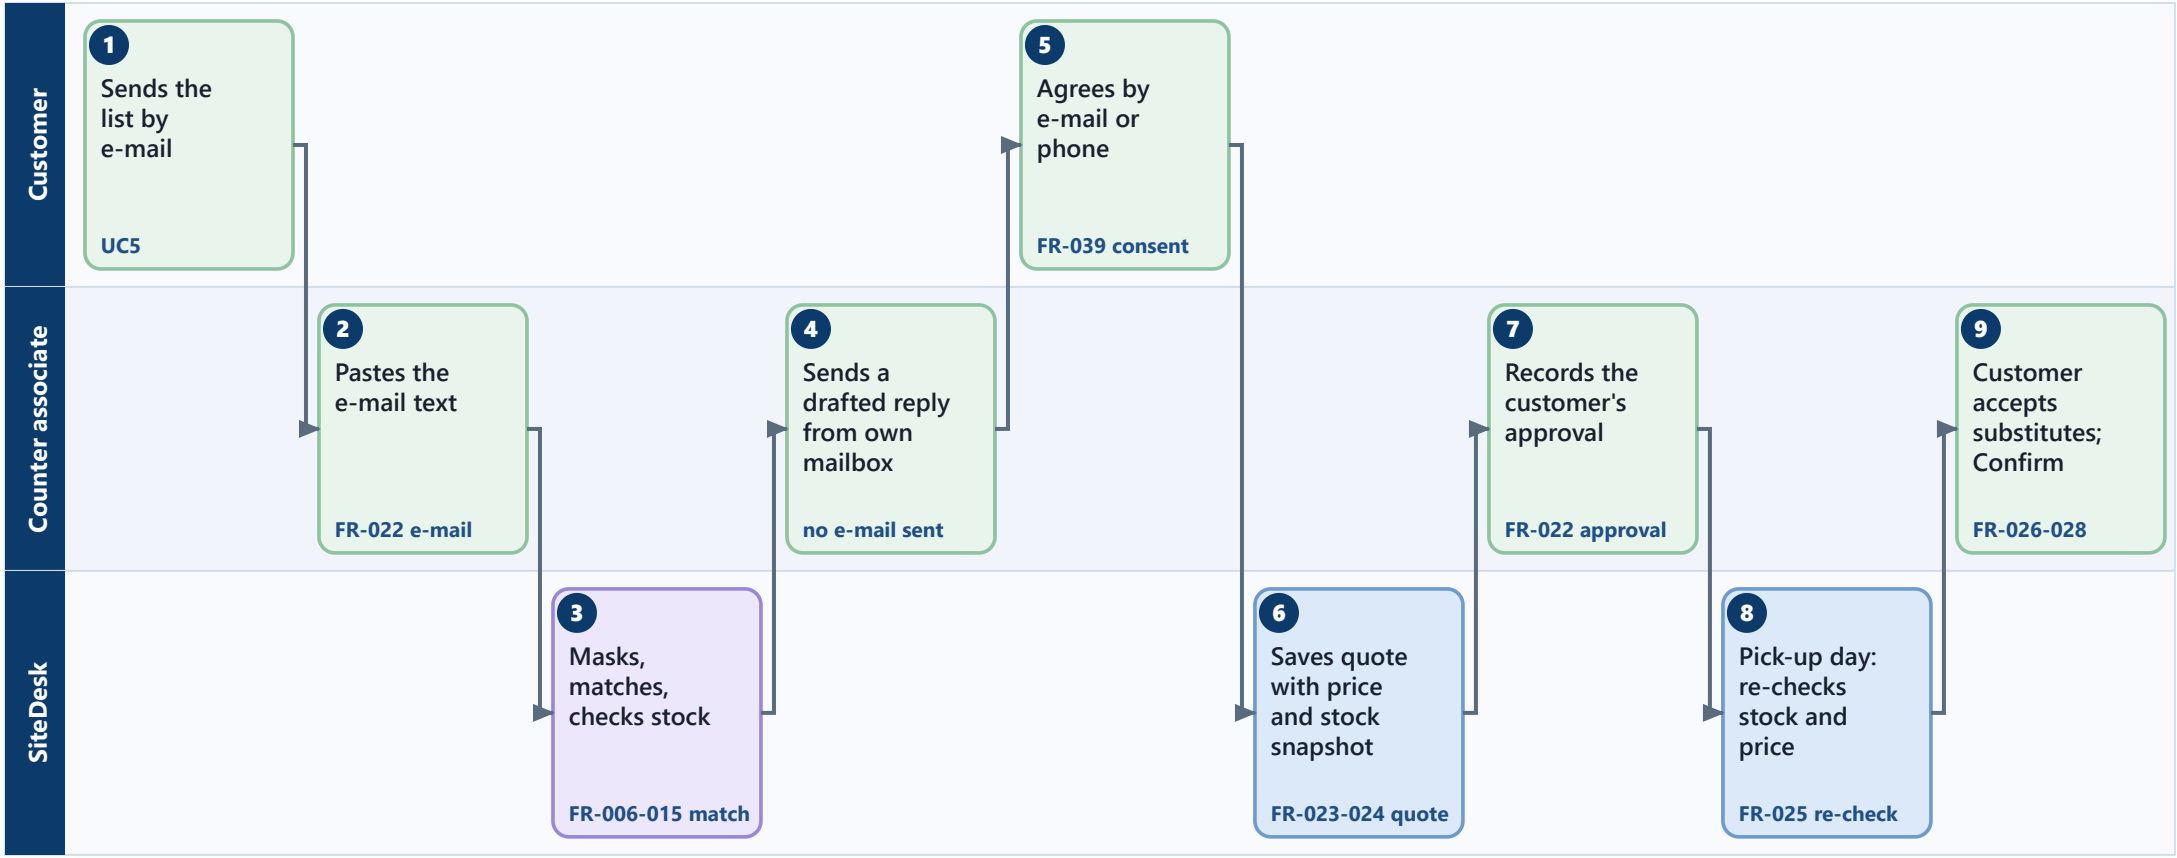

POS is down
CSV with the same reference.

Value on every receipt
Sales rescued by substitutes · time from upload to Confirm (simulated data).

AI-assisted (local embeddings) · Hard rules (deterministic) · Human decision or action · R1 = Round 1 problem · FR = requirement in the team's SRS v2

User journey 2: e-mail request to pick-up

The customer is not at the counter · SRS v2: UC5

Alternative paths and guardrails

No quote, no Confirm
QUOTE_REQUIRED blocks the order.

No approval, no Prepare
Sending a quote is not approval.

Stock changed
The re-check flags short lines.

Quote expires
Expired or cancelled: cannot confirm.

Why it matters
Nothing is reserved, so the live re-check keeps promises honest.

AI-assisted (local embeddings) · Hard rules (deterministic) · Human decision or action · R1 = Round 1 problem · FR = requirement in the team's SRS v2
